Models 7642 and 7675 extensometers

These extensometers use a high-temperature capacitive sensor and do not require any cooling. They will operate up to the maximum temperature limit of most environmental chambers used in materials testing. The Model 7642 is ideal for testing composites, metals and high temperature polymers in tensile, compression or cyclic testing. All units can be displaced in both compression and tension.

The extensometer is supplied with the revolutionary DT6229 controller. The standard output is 0-10VDC analog signal, factory calibrated with the PC. The 7642 may be used for strain controlled tests such as low cycle fatigue. The extensometer is supplied with the revolutionary DT6229 controller. This system provides a number of functional enhancements, including high speed digital output, built in calibration and tare functions, analog and digital filters, and more.

The 7642 is readily interfaced with most existing test controllers, and may be directly connected to a data acquisition system or chart recorder, or directly to a PC. The 7642 may be used for strain controlled tests such as low cycle fatigue.

### Features
- May be left on through specimen failure.
- Improved performance at high temperature.
- Reduced size and weight, and improved high frequency performance up to 100 Hz.
- Improved noise rejection.
- Digital controller and power supply included. Provides high level DC voltage output with low noise. Easily interfaced to test controllers, data acquisition boards and chart recorders.
- Includes high speed analog and digital outputs.
- Intuitive web-based user interface for setup, calibration, and data acquisition.
- Built-in calibration reference and auto-zero features.
- Multiple extensometer calibration files may be loaded for use with one controller.
- Multiple temperature-specific calibrations may be stored.
- Selectable analog and digital filter options from 2 Hz to 3 kHz.
- Ships fully electronics with user specified voltage output.
- All models can measure in both tension and compression and may be used for cyclic testing.
- Mechanical over-travel stops.
- All standard units meet existing ASTM class B-1 and ISO 9513, class 0.5 requirements for accuracy.
- Hardened tool steel knife edges are easily replaced. A spare set comes with every extensometer.
- Includes high quality foam lined case and a spare set of knife edges.
- Rugged, dual flexure design for strength and improved performance. Much stronger than single flexure designs, this also allows cyclic testing at higher frequencies.
- Temperature range and temperature range listed below is available, except as noted.

### Specifications

- **Input**: Includes power supply for your country (specify)
- **Analog Output**: User specified, +/-5 VDC or +/-10VDC typical, 10 VDC rail
- **Digital Output**: 24 bit high speed Ethernet output with built-in web interface
- **Linearity**: ±1 point linearization, ±0.1% FS typical linearity
- **Resolution**: ±0.05 PPM (0.00005%FS) RMS@ 4 kHz, ±0.06 PPM (0.00006%FS)@ 100 Hz
- **Cyclic Testing**: ±0.25 Hz typical, up to 100 Hz with small travel units, ±0.8 mm travel
- **Analog Filter**: Selectable 100 Hz analog and 2 Hz-2 kHz digital filters
- **Temperature Range**: Ambient to 600 °C (1100 °F) typical
- **Temperature Sensitivity (Gain)**: <100 PPM/°C (0.01%FS/°C) typical
- **Temperature Sensitivity (Amplitude)**: 26 PPM/°C (0.002%FS/°C) typical
- **Sensor Cable**: 2.5 ft (7.6 m) tri-axial high temperature cable, plus 5 ft (1.5 m) room temperature extension cable
- **Standard Quick Attach Kit**: Fits round samples up to 0.60” (15 mm) and flats to 2.0” (50 mm) wide for thicknesses up to 0.25” (6.35 mm) and 0.75” (19 mm) wide for specimens 0.25” (6.35 mm) to 0.50” (12.5 mm) thick.
- **Operating Force**: <100 g typical
- **Environmental**: Recommended for elevated temperature testing in dry air or some other gases.

### Options

- **Gauge length adapter kits**: Not recommended over 570 °F (300 °C)
- Connections to interfaces to nearly any brand test equipment
- Bulkhead adapters for vacuum chambers
- Dual-channel DT6229 controller available

### Ordering Information

**Model 7642 Available Versions**: Any combination of gauge length, measuring range and temperature range listed below is available, except as noted. Other configurations may be available with special order; please contact Epsilon to discuss your requirements.
